Abstract

Al-mestrehi. Hussein Hekmat. (2013**). The Effect of Narrow and Selective Reading Strategies in Improving Vocabulary Learning and Reading Comprehension in Arabic Language among Eighth Basic-Grade students in Jordan**. PhD Dissertation. Yarmouk University. Supervisor: Prof. Hamdan Ali Nasser.

The purpose of this study was to investigate the effect of Narrow and Selective Reading Strategies in developing Vocabulary Learning and Reading Comprehension in Arabic Language among Eighth Graders in Jordan. The sample of the study consisted of (116) male and female students from the eighth grade distributed into six schools chosen purposefully from Al-kora Educational directorate schools taking into consideration gender, availability of suitable libraries as well as number of classes. Six classes were chosen randomly, divided into three groups, first and second experimental groups and a control group. The first experimental group was taught through narrow reading consisted of (23) male and female students, (11) are males from Kufr Kefea basic schools for boys and (12) females from Kufr Kefea basic schools for girls. The second experimental group was taught through Selective reading consisted of (43) male and female student, (23) of them are males from Samou school for boys and (20) female students from Samou schools for girls. Meanwhile, the control group was taught through the traditional method consisted of (50) male and female students. (26) of them are from Jenin Alsafa comprehensive school for boys and (24) female students from Jenin alsafa mixed school.

The researcher administrated two tests, the first to measure vocabulary learning while the second was a test for reading comprehension. Both tests were valid and reliable for the purposes of this study. The study was applied for (12) weeks within one class weekly. Reading strategies were carried

according to the procedures of each strategy with a feedback from Arabic language teacher.

The findings showed that there is a significant statistical difference on the vocabulary learning test as a whole in the favor of the (narrow, Selective) groups. There is a significant statistical difference on vocabulary learning test as a whole and in meaning and indication as well as using vocabulary learning attributed to gender or interaction between gender and reading strategy.

Furthermore, there were significant statistical differences on the reading comprehension test in both critical and creative levels in the favor or of the (narrow, Selective) groups. There was significant statistical difference on the reading comprehension test in both level in the favor of narrow reading group against selective reading group. Meanwhile, there were no significant statistical differences on the reading comprehension test in both levels attributed to gender or interaction between gender and reading strategy.

Key Words: Narrow Reading Strategy. Selective Reading Strategy. Vocabulary Learning. Reading Comprehension.
